

Geological Survey Water-Supply Paper Volume 1664-1668

Filesize: 6.29 MB

Reviews

This kind of publication is every thing and got me to searching in advance and much more. It really is simplistic but surprises within the 50 percent from the ebook. I am easily could get a satisfaction of studying a composed publication.

(Orval Halvorson III)

To get **Geological Survey Water-Supply Paper Volume 1664-1668** PDF, remember to access the button below and download the ebook or gain access to additional information which are have conjunction with GEOLOGICAL SURVEY WATER-SUPPLY PAPER VOLUME 1664-1668 ebook.

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. Excerpt: .solution were diluted to a manganous-ion concentration of 10 ppm. The portions were then raised to several selected pH values, ranging from 7.0 to 9.5, by adding sodium hydroxide. The solutions were then allowed to remain in contact with air, and samples were taken from time to time for determination of dissolved manganese by the standard periodate oxidation procedure. Before the manganese concentration was determined, the pH and potential of a bright platinum electrode, assumed to be the Eh of the sample, were measured, and the aliquot was filtered through a plastic-membrane filter whose pore diameter was 0.45 μ . Results are given in table 3. All these solutions tended to reach a constant pH near 7.0 after standing for a day or more. All the manganese was retained in solution except where the initial pH was 9.0 or greater. In most of the solutions the measured potential had a steady upward trend, and after 5 days it was between 0.54 and 0.56 v. The Mn⁺² in these solutions was oxidized to Mn⁺³ or Mn⁺⁴, in part, and these forms precipitated as Mn₂O₃ or MnO₂, thereby lowering the pH. When the pH became unfavorable for further oxidation, the reactions stopped. In solution 2, measured and computed potentials remained close together for the entire series of observations (table 3). In solutions 3 to 6, a decided lack of equilibrium was observed at the start of the test. After 30 minutes, equilibrium had returned to solution 3, and...
