## PROGRESS IN INVERSE SPECTRAL GEOMETRY

Book Condition: New. Publisher/Verlag: Springer, Basel | most polynomial growth on every half-space  $\text{Re}(z) \geq c$ . Moreover,  $\text{Op}(t)$  depends holomorphically on  $t$  for  $\text{Re } t > 0$ . General references for much of the material on the derivation of spectral functions, asymptotic expansions and analytic properties of spectral functions are [A-P-S] and [Sh], especially Chapter 2. To study the spectral functions and their relation to the geometry and topology of  $X$ , one could, for example, take the natural associated parabolic problem...
